Profile

Motivated fullstack developer with a focus on modern web applications and hands-on experience in frontend, backend, and DevOps. Proven ability to implement solutions using React, Node.js, Spring Boot, MongoDB, PostgreSQL, and Docker. Currently pursuing a part-time degree in Computer Science (FHNW), combined with strong initiative, teamwork, and practical execution skills.

Professional Experience

Fullstack Software Engineer

Aegerter & Bosshardt AG in Basel
Since 09.2022

- Development and operation of company wide web applications using React, Next.js, Spring Boot, and PostgreSQL
- Design and implementation of a digital document management system to digitize and automate internal processes
- Development and integration of REST APIs, including the connection of existing data sources and enterprise systems
- Responsibility for deployment, containerization, and development environments using Docker
- Creation of automated build, test, and deployment pipelines with GitLab CI/CD
- Ensuring software quality through automated testing and monitoring with Sentry
- Close collaboration with stakeholders in the analysis, design, and implementation of new requirements

Draftsman, Civil Engineering

Aegerter & Bosshardt AG in Basel
08.2019 - 09.2022

- Creation of construction plans for small to medium-sized infrastructure projects (structures, pipelines, road construction, etc.)
- Development of internal drafting standards for structural and drainage projects
- Mentoring apprentices within the department

Tech Stack

Programming Languages:

🔥 Java
📄 JavaScript
📄 TypeScript

Backend:

🌱 Spring Boot
📦 Node.js

Frontend:

🅒 Next.js 🎯 Three.js
⚛️ React 🌊 Tailwindcss

Database:

🐉 PostgreSQL
🌿 MongoDB

Testing:

🔴 Junit
🐉 Jest
📄 Cypress

Tools:

🐳 Docker 🔴 GitLab CI/CD
🔴 Git 📦 RabbitMQ

Project Experience (Open Source & Academic Projects)

Infboard.ch 2.0

Fullstack Development – File management system for students, 2026

- Platform for structured file management for FHNW students
- Frontend with Next.js & TypeScript, backend with Express & MongoDB
- Features: drag and drop, versioning, dashboard overview, JWT authentication
- CI/CD pipeline with GitLab & Docker, production-ready setup

 [Live Demo](#) (Login: user: guest · pw: password) · [Code \(GitLab\)](#)

TourBooking Plattform

Fullstack Development – Real-world academic project, 2024

- Web application for a visitor center to automate tour bookings, guide assignment, invoicing, and feedback collection
- Frontend with React & TypeScript, backend with Spring Boot
- JWT authentication, QR invoices, Sentry logging, Cypress E2E tests
- CI/CD with GitLab & Docker

 [More Infos](#) · [Code \(GitLab\)](#)

Multiplayer Tetris

Web Workshop – Real-time distributed game, 2025

- Real-time multiplayer Tetris with centralized game logic in a Node.js backend
- WebSocket communication with synchronized gameplay
- React frontend with Socket.IO, backend with Express
- Automated build and deployment using Docker and GitHub workflows
